

Space!

Consider exploring what Tim Peake has been doing on the International Space Station (ISS) and what experiments he conducted up in space.

- Tim uses Twitter a lot to communicate with the world, why not follow him and see what he is up to? Perhaps you can tweet a question from the children.
- Visit the YouTube Channel set up to show what is happening in the ISS including the Lego Big Build. Can the children build the ISS out of Lego bricks? What about a model using crates and boxes?
